

SKILLED INSTRUMENT FLIGHT PROCEDURE DESIGNER

Do you enjoy working in the aeronautical world and taking on the challenges of this sector?

Do you want to join a dynamic entity where employees have a team spirit, work on innovative projects all over the world, and are attached to human values and conviviality?

CGX AERO supports air transport players in meeting their operational challenges in terms of safety and sustainable development, by providing software and services adapted to their issues.

The **Procedure design service** brings together a team of ten consultants working on a wide range of topics (data acquisition, mapping, visual and instrument flight paths, NAVAID implementation, etc.), in France and abroad.

Your missions

You will report to the Procedure design activities Manager and will participate in the **provision of consultancy to airports and civil aviation**. Your main tasks will be as follows :

- Participate in data acquisition missions in coordination with our team of surveyors,
- Designing instrument flight procedures (IFP),
- Coordinate the production of procedure charts with our team of cartographers,
- Provide the technical reports related to the design of these procedures, and support our clients until the start of operations,
- Negotiate and coordinate with a wide range of stakeholders including airports, airlines, air traffic controllers, military, etc,
- Conducting aeronautical impact studies.

The position is for you if

- You have a degree in Aeronautical Engineering or Master or Air Traffic Controller with a safety component.
- You have 4 years' operational experience in the procedure design environment,
- You have advanced oral and written communication skills,
- You are fluent in English,
- You like working in a team, building together, sharing difficulties and successes.

Proficiency in the French language and knowledge of GeoTITAN® would be appreciated.

Work Environment

Position based in **Toulouse (Labège)**

Executive statues (Syntec agreement)

Travel in France or abroad (missions of 1 to 10 days)

Friendly work environment, facilitating autonomy

Agile SME facilitating initiative (capacity to develop new activities, synergies between existing activities, etc.)

Benefits

Permanent contract

16 days of RTT

Mutual insurance and **provident** fund covered at 100% by the company

Meal ticket

Summer bonus

Flexible organization (up to 10 days of teleworking per month)
